

Company Profile

What's YAMABUN?

We are specialists of the thickness measurement for polymer films and sheets in Japan.

The high-quality and low-cost production system is supported by our thickness measuring systems.

We have many principles for thickness measuring systems.

I am looking forward to the opportunity of serving you.

Thickness Measuring Systems by YAMABUN

Laser Type **NSM-RM**

For ~ 0.999 mm

*Non-contact type On-line
Sheet Thickness Measuring System*

X-ray Type **NSW-X**

For 0.001 ~ 1 mm

*Non-contact type On-line
Sheet Thickness Measuring System*

Pneumatic Type **NSW-EA**

For 1 ~ 15 mm

*Non-contact type On-line
Sheet Thickness Measuring System*

Contact Type **TOF-4R/5R**

For 0.03 ~ 3 mm

For 0.02 ~ 0.1 mm

*Contact type Off-line
Sheet Thickness Measuring System*

Past record of Sales in Japan

On-line: 600 systems

Off-line: 300 systems

Future developments of YAMABUN

We make a presentation to K2010 show.

This show is international trade fair No.1 for Plastics and Rubber worldwide.

Taking this opportunity, we will expand our market to the world.

Come and see us if you are ever in K2010 show.

Exhibition

Laser type Online Thickness Measuring System for over sea (Thickness range: ~ 3.0 mm)

Desktop type Offline Thickness Measuring System (Thickness range: 0.02 ~ 3.0 mm)

*You can try test for your sample in K2010 show. Please do not hesitate to ask us.
